Dear colleagues!

We invite you to take part in the work of the international symposium

THE CURRENT STATE AND DEVELOPMENT PROSPECTS OF BIOORGANIC CHEMISTRY, MOLECULAR MEDICINE AND BIOTECHNOLOGY

The symposium will be held from November 3 to 8, 2020 in Tashkent, the Republic of Uzbekistan.

This will be the largest symposium, which will bring together experts in the field of bioorganic chemistry, molecular biology, biotechnology.

The symposium will be devoted to a discussion of the results and prospects of basic research in the following areas:

- Search, isolation and synthesis of new biologically active compounds (proteins, peptides, nucleotides, carbohydrates, low molecular weight compounds).
- Physicochemical methods for studying the structure and mechanism of action of biologically active compounds. Structure-function relationship.
- Chemistry and biology of enzymes.
- Omix data integration technologies: genomics, proteomics, peptidomics, metabolomics.
- Innovative drugs based on biologically active compounds. Pharmacoinformatics: search and modeling of drugs.
- Bioengineering and biotechnology (including plant biotechnology).

During the symposium you will have the opportunity to present information about your developments, get acquainted with the latest developments of foreign and domestic colleagues, expand business contacts, discuss the possibility of conducting joint research, find potential consumers of scientific and technical products.

Acting lectures will be delivered by Nobel Prize winners
ARIEH WARSHEL and RICHARD ROBERTS,
as well as invited speakers from
leading domestic and foreign scientists.
